Personal Customer Support

At Premier Data Software, customer support is personal and skilled. You will usually speak to one of the actual system developers or analysts, not a trainee or new hire.

HIPAA / Regulatory Compliance

We have a system in place to ensure your processing stays compliant. Our comprehensive support net provides expertise and modifications when and how you need them, whether it is just after your system is installed, or after years of processing.

Custom Systems

The Premier Data Software experts understand that, like people, funds are often unique in their methods. For that reason, we gladly modify the core SBA/i system functionality around the way you work best. To meet your specific needs, Premier Data can provide a unique system on a Microsoft Windows or IBM AS/400 (now called iSeries) platform.

Super Benefit Administrator/i

General Ledger

Automated Billing

Ingenix Price Codes

Imaging and Document Management

Simplicity

SBA/i is comprehensive, single-point data entry enterprise software. Entering information in one part of the system is sufficient because all modules reference master database records. Manage multiple funds with centralized administration.

Member/Customer Service

Servicing your members is fast and effective in SBA/i. From any screen, simply press the [Esc] key to invoke the Customer Service Module. When finished, you return exactly to the spot where you began the inquiry. Provide Internet reporting for your members.

Peace of Mind

If you are uncomfortable with your current software or vendor, call and find out how your fully-integrated SBA/i system can provide the reliability and peace of mind you should have from your software.
